

**Water & Sanitation Project, Cycle 9**  
**Funded by Rotary Club of Perth**

Villagers help each other install pit latrine liners and build outhouses.

Concrete rain water jars are delivered. CFS staff and villagers roll these heavy containers into place where rain water from the roof can run off into the jar which can hold 2000 litres.

Low-tech water filters provide clean drinking water

CFS teaches students and villagers to understand the importance of good sanitation and hygiene.  
In participating schools CFS trains student peer educators to teach fellow students.

**Water & Sanitation Project statistics July – December 2016**  
(funding from Rotary Club of Perth and private donors)

<b>Number supplied</b>	<b>Rattanak Mondul District</b>	<b>Kamrieng District</b>
